
MINGDA Company Profile

Hebei Mingda International Trading Company is a trading company which is specialized in castings, forgings and machining parts.

We have deep business interaction with manufacturers in major cities of China, so we are quite flexible and confident to be very fond of making products to be able to meet our customers' request on quality and delivery time.

Our products include all kinds of non-casting to be made of ductile iron, grey iron, brass, stainless steel and aluminums, machined castings and forged parts. To make these parts consistent with the customers' drawings, we have stable suitable production craft and equipments, such as semi-sand, sand-mould, lost-core-foams, lost-wax, hot- foams and so on.

Specially for hydrant bodies and valves' bodies, we have collected rich experiences for many years, and have established long-term relations with our products with good surface and high quality material, which means we have been trying our best to provide our customers with better quality castings by improving production crafts and more careful quality control.

Apart from buyers' requirements, we also have our own very strict quality requirements for castings. Only in this way, we can be responsible for them. It could be done exactly according to our customers' requirements, quality standards. This saves much time and money for both sides. From founded in 2008, we have passed ISO9001:2008 quality system certification, and we win a great reputation in the casting and machinery industry whoever from customers or our partners.

Now our products are mainly exported to Germany, Sweden, UK, Denmark, France, USA, Middle East, and so on.

Looking forward to receiving your kindly feasible reply at your earliest
